

Novel insecticidal suspension concentrates

Abstract

The present invention relates to aqueous suspensions of insecticidally active compounds, characterized in that they comprise

- a) 0.1 to 12.5 % of an inorganic carrier having a particle size of 1 to 30  $\mu\text{m}$  and bearing a coating of active compound,
- b) 2.5 to 10 % of formulation auxiliaries,
- c) 62.5 to 97.4 % of water
- d) 0 to 15 % of glycerol.
